

CYPRESS

CYPRESS INTERNET OF THINGS (IOT) COMMUNITY LICENSE

The License below is a click-through license that will be used to ensure that persons accessing the Cypress IoT Community website agree to the terms of participation for the Cypress IoT Community. The license will be used beginning on the Closing Date of the Cypress acquisition of the IoT Business from Broadcom (the acquisition is codenamed Project Le Cose).

Prior to close, both Cypress and Broadcom have their own communities. However the Cypress and Broadcom Communities operate on different paradigms. One major difference between the communities is how software downloaded from the community is licensed. Entrance into the Broadcom Community requires each new Broadcom Community member to agree to a single software license that governs all software that can be downloaded from the Broadcom Community website. Cypress, on the other hand, does not require Cypress Community members to agree to a general software license in order to become a Cypress Community member. Instead, when software is downloaded from Cypress, the prospective downloader is required to agree to the terms of a click-through license that has been tailored to the requirements of the particular software to be downloaded.

The Cypress IoT Community was created by Cypress to be a community within the Cypress Community. Hence, it is a subset of the Cypress Community and was created from the IoT-specific subset of the greater Broadcom Community. Beginning on the Project Le Cose Closing Date, the Cypress Community website portal will be expanded to provide the community member a choice of entering the “classic” Cypress Community or the Cypress IoT Community. The first time a user clicks on the portal to enter the Cypress IoT Community, the prospective Cypress IoT Community member will be required to read the Cypress IoT Community License and agree to its terms and conditions by clicking on an “Agree” button. The prospective Cypress IoT Community member will not be able to enter the Cypress IoT Community without agreeing to the terms and conditions of the Cypress IoT Community License.

There are basically four types of prospective Cypress IoT Community members and each type will be required to agree to the Cypress IoT Community license.

First, there are members of the Broadcom Community. They will be able to keep their Broadcom Community name, but will need to agree to the Cypress IoT Community License. This is because there are new terms, such as agreeing to the Cypress Privacy Policy, that they had not agreed to when joining the Broadcom Community.

CYPRESS

Second, there are members of the Cypress Community. They will be able to keep their Cypress Community name, but will need to agree to the Cypress IoT Community License. This is because there are new terms, such as the general software license agreement for software downloaded from the Cypress IoT Community site, that they had not agreed to when joining the Cypress Community.

Third, there are those prospective members that are not members of the Cypress or Broadcom Communities. They will be able to create a Cypress Community name, and will need to agree to the Cypress IoT Community License in order to enter the Cypress IoT Community site,

Fourth, there are those prospective members that are already members of both the Cypress and Broadcom Communities. They could be treated as any one of the other three prospective member types. That is, they could be able to use their Broadcom Community name, Cypress Community name or to create a new Cypress IoT Community name. This could be done by offering them a choice or by adopting a forced policy. For example, if the prospective Cypress IoT Community member already has a Cypress Community member name, it may be a better policy to keep that name as their Cypress IoT Community member name. Regardless of how implemented, these members will still need to agree to the Cypress IoT Community License in order to enter the Cypress IoT Community site,

The above approach is a temporary way to handle the different terms and conditions of the Broadcom and Cypress Communities immediately upon completion of the acquisition. It is anticipated that incremental changes will be made over time to the Cypress IoT Community website and license until the general Cypress Community terms and conditions apply to the Cypress IoT Community. Once the Cypress IoT Community has the same terms and conditions as the rest of the Cypress Community, the two communities can be merged and share a single common portal.

The parties hereto agree to replace any such invalid

or unenforceable provision with a new provision that has the most nearly similar permissible economic or other effect. You may not assign, delegate or otherwise transfer, whether by agreement, operation of law or otherwise, any right or obligation hereunder without the express prior written consent of CYPRESS, and any attempted assignment, delegation or transfer without such consent shall be void.
